Junming DUAN

HUMBOLDT RESEARCH FELLOW

Room 03.017, Emil-Fischer-Straße 40, 97074 Würzburg, Germany

■ +49 931 31-82837 | ■ junming.duan@uni-wuerzburg.de | ★ junmingduan.github.io | ● 0000-0002-3532-9995

Academic Positions ___

October 2023 – September 2025 Humboldt Research Fellow

Fakultät für Mathematik und Informatik, Universität Würzburg, Germany

Host Professor: Prof. Dr. Christian Klingenberg

September 2021 – September 2023 Postdoctoral Researcher

MCSS, École Polytechnique Fédérale de Lausanne (EPFL), Switzerland

Mentor: Prof. Jan S. Hesthaven

Education ___

September 2016 - July 2021 Ph.D. in Computational Mathematics

Peking University, China

Entropy stable numerical methods for special relativistic (magneto)hydrodynamics

Advisor: Prof. Huazhong Tang

September 2012 - July 2016 B.Sc. in Information and Computing Science

Peking University, China

Research Interests ___

- Numerical methods for hyperbolic conservation laws
- Computational fluid dynamics
- High-order accurate numerical methods
- Structure-preserving methods
- Moving mesh methods
- Reduced-ordel modeling
- Data-driven methods and scientific machine learning

Research Publications ____

JOURNAL ARTICLES

- 1. J. Wang, **J.M. Duan**, Z.W. Ma, and W. Zhang, An adaptive moving mesh finite difference scheme for tokamak magneto-hydrodynamic simulations, *Comput. Phys. Commun.*, 294: 108951, 2024.
- 2. Z.H. Zhang, **J.M. Duan***, and H.Z. Tang, High-order accurate well-balanced energy stable adaptive moving mesh finite difference schemes for the shallow water equations with non-flat bottom topography, **J. Comput. Phys.**, 492: 112451, 2023. *arXiv*:2303.06924.
- 3. S.T. Li, **J.M. Duan**, and H.Z. Tang, High-order accurate entropy stable adaptive moving mesh finite difference schemes for (multi-component) compressible Euler equations with the stiffened equation of state, *Comput. Methods Appl. Mech. Engrg.*, 399: 115311, 2022. *arXiv:2202.07989*.

PREPRINTS

- 14. **J.M. Duan**, Q. Wang, and J.S. Hesthaven, Machine learning enhanced aerodynamic forces prediction based on sparse pressure sensor inputs, submitted to *AIAA J.*, 2023. *arXiv:2305.09199*.
- 15. **J.M. Duan*** and J.S. Hesthaven, Non-intrusive data-driven reduced-order modeling for time-dependent parametrized problems, submitted to *J. Comput. Phys.*, 2023. *arXiv:2303.02986*.

Awards & Honors	
Humboldt Research Fellowship for Postdoctoral Researchers, Alexander von Humboldt Foundation	July 2023
Outstanding Graduate of Peking University, Peking University	July 2021
National Scholarship for Graduate Student, Chinese Ministry of Education	December 2020
Merit Student of Peking University, Peking University	October 2020
The First Prize in Outstanding Youth Paper Award of Beijing Society of Computational	August 2020
Mathematics, Beijing Society of Computational Mathematics	
BICMR Scholarship for Graduate Student, Beijing International Center for Mathematical Research	2019-2020
(BICMR), Peking University	
President Scholarship for PhD Student, Peking University	2018-2020
Founder Scholarship, Peking University	September 2019
DTZ Cushman & Wakefield Scholarship, Peking University	September 2017
Outstanding Undergraduate of Peking University, Peking University	July 2016
Conferences & Talks	
CAM Seminar, Southern University of Science and Technology, Shenzhen, China (Talk: Machine	July 01, 2023
learning based non-intrusive reduced-order modeling and aerodynamic forces prediction)	July 01, 2023
ECCOMAS YIC 2023: 7th Young Investigators Conference, University of Porto, Porto, Portugal	June 19-21, 2023
(Talk: Non-intrusive data-driven reduced-order modeling for time-dependent parametrized problems)	Julie 13-21, 2023
Swiss Numerics Day 2023, Universität Bern, Bern, Switzerland (Talk: Machine learning enhanced	June 07, 2023
aerodynamic forces prediction based on sparse pressure sensor inputs)	June 01, 2025
MATHICSE Retreat, Bienne, Switzerland (Talk: Machine learning enhanced aerodynamic forces	June 05-06, 2023
prediction based on sparse pressure sensor inputs)	00000 00, 2020
Oberseminar, host by Prof. Christian Klingenberg, online (Talk: Data-driven reduced-order modeling	November 17, 2022
for time-dependent parametrized problems)	,
MultiMat 2022: 10th International Conference on Numerical Methods for Multi-Material Fluid	August 22-26, 2022
Flow, Universität Zürich, Zürich, Switzerland (Talk: High-order accurate entropy stable adaptive	· ·
moving mesh methods)	
MATHICSE Retreat, Villars-sur-Ollon, Switzerland (Talk: High-order accurate entropy stable adaptive	June 27-29, 2022
moving mesh methods)	
Symposium on High-Fidelity Numerical Simulation of Fluid Problems, Peking University,	June 05-07, 2021
Beijing, China (Talk: Entropy stable schemes for RHD)	

Conferences & Talks (continued)	
Forum of Numerical Methods and Applications in Fluids, Xiangtan University, Xiangtan, China	December 11-13, 2020
(Talk: Entropy stable adaptive moving mesh schemes for RHD)	
Student Forum of Chinese Society of Industrial and Applied Mathematics, online (Talk: Entropy	November 14-15, 2020
stable adaptive moving mesh schemes for RHD)	
The National Mechanics Graduate Student Forum, Peking University, Beijing, China (Poster:	November 06-08, 2020
High-order entropy stable DG schemes for RMHD)	
Selection of Excellent Young Scholar's paper of Beijing Society of Computational Mathematics,	August 30, 2020
online (Talk: PCP Lagrangian scheme for RHD. The first prize.)	
Annual Meeting on High Resolution Method for Multi-Material Hydrodynamics of Science	November
Challenge Project, Xiamen University, Xiamen, China (Talk: PCP Lagrangian scheme for RHD)	29-December 01, 2019
Workshop on Numerical Methods for Complex Physical Problems, Nanjing University of	August 28-30, 2019
Aeronautics and Astronautics, Nanjing, China (Talk: High-order entropy stable finite difference	
schemes for RHD)	
The 12th National Annual Meeting of Computational Mathematics, Harbin, China (Talk:	July 31-August 04, 2019
High-order entropy stable finite difference schemes for RHD)	
Graduate Student Forum of Chinese Society of Industrial and Applied Mathematics, Academy of	June 22, 2019
Mathematics and System Science, Chinese Academy of Science, Beijing, China (Talk: PCP	•
Lagrangian scheme for RHD)	
Annual Meeting of Center for Applied Physics and Technology, Peking University, Beijing, China	December 13, 2018
(Talk: PCP Lagrangian scheme for RHD)	, , , , , ,
Annual Meeting of Science Challenge Project, Jilin University, Changchun, China (Talk: PCP	November 17-19, 2018
Lagrangian scheme for RHD (with Dan Ling), selected as one of the five best posters)	,
Beijing Seminar on Computational Fluid Dynamics, Beijing Institute of Applied Physics and	November 11, 2018
J6	
Computational Mathematics, Beijing, China (Talk: PCP) agrangian scheme for RHD)	November 11, 2010
Computational Mathematics, Beijing, China (Talk: PCP Lagrangian scheme for RHD)	November 11, 2010
Computational Mathematics, Beijing, China (Talk: PCP Lagrangian scheme for RHD) Teaching Assistant	November 11, 2010

Research Projects	
New Efficient Structure-Preserving Numerical Methods for the Multi-dimensional Euler Equations:	2023-2025
design efficient adaptive moving mesh methods and reduced-order models with structure	
preservation for solving the multi-dimensional Euler equations	
Supported by Alexander von Humboldt-Stiftung. Design and verification of numerical methods. PI	
Sense Dynamics: construct precise surrogate models of transient nonlinear physical phenomena	2021-2022
related to aerodynamics	
Supported by Swiss Data Science Center. Design and verification of numerical simulations for a 3D drone.	
PI: Dr. Doytchinov lordan	
High-Order Accurate Adaptive Moving Mesh Methods for Compressible Fluid Flows: design and	2021-2022
verification of high-order accurate adaptive moving mesh methods for solving the Euler and	
Navier-Stokes equations in 2D and 3D	
Supported by National Numerical Windtunnel Project. Design and verification of numerical methods. Pl:	
Prof. Huazhong Tang	
Computational Methods for the Interface and Elastoplastic Fracture in Fluid Mechanics: design and	2019-2020
verification of high-order accurate adaptive moving mesh methods for solving multi-material flows	
Supported by Science Challenge Project. Design and verification of moving mesh schemes for	
multi-component flows. PI: Prof. Huazhong Tang	
High-Order Accurate Robust Numerical Schemes for Multi-Material Implosion Hydrodynamics:	2016-2018
research on high-order accurate Lagrangian schemes for solving compressible hydrodynamics	
Supported by Science Challenge Project. Verification of high-order accurate Lagrangian schemes. Pl: Prof.	
Huazhong Tang	

Professional Services _

Refereeing: AMS Mathematical Reviews, Journal of Computational Physics, Journal of Computational and Applied Mathematics, Communications in Nonlinear Science and Numerical Simulation, International Journal for Numerical Methods in Engineering, East Asian Journal on Applied Mathematics, Communications in Computational Physics, Journal of Scientific Computing, International Journal of Computational Methods

Other Information ___

■ Skills: C, C++, MPI, Python, PyTorch, MATLAB, OpenFOAM, PETSc, Linux shell, Fortran, धा-X, . . .
